

The Y Cool Keyboard with stylish 7-color backlighting ensures maximum comfort and usability in any lighting conditions. Its sealed, washable design with convenient lock function makes cleaning easy and hygienic.

For extra protection, the keyboard comes with a sterilisable transparent cover, available in flat or profiled versions. With its compact size and flexible cable management, this keyboard is perfect for use on medical carts or wall mounts.

VISIBLE IN THE DARK BACKLIT

The backlit keys can be set to green, blue, purple, yellow, red, white, or turquoise for better visibility in low light.

GERM BARRIER STERILISABLE DRAPE

The transparent drape -flat or with key profile- blocks bacteria from getting between the keys. For the ultimate clean, it can be sterilised in an autoclave or washer-disinfector.

SAFELY WIPE, SPRAY AND RINSE CLEAN HYGIENICALLY

Both the keyboard and drape can be cleaned using your standard method; rinsed, sprayed, or wiped with soap, water -delete comma-and approved cleaning solutions. The lock function keeps your data safe while cleaning.

USE YOUR STANDARD DISINFECTANT DISINFECTABLE

The keyboard withstands most common surface disinfectants, so you can clean and disinfect it like any other high-touch surface.

USER FRIENDLY TOUCH AND SPEED OF A REGULAR KEYBOARD

The mechanical keys provide full travel and tactile feedback for comfortable, efficient typing. Thanks to its curved back, the keyboard also tilts slightly and has a smooth, crevice-free base that is easy to clean.

HIGH VISIBILITY PROMOTE INFECTION CONTROL

The white surface helps highlight dirt or contamination, so it is easy to spot and clean right away.

SMART CABLE QUICK INSTALL

The Y Cool includes a 38 cm cable with four routing options and a 150 cm extension, making setup flexible. The detachable cable offers double strain relief for long-term durability.

SAFE CHOICE FREE OF ANTIMICROBIAL COATING

We choose not to use antimicrobial coatings to avoid any risk of potential harm to users or to the environment.

Cleaning Specifications

CLEANING FLUIDS ALLOWED

Soap and water.

Approved surface disinfectants, such as those based on alcohol, chlorine $\leq 10\%$, formaldehyde $\leq 37\%$, glutaraldehyde, phenol or quaternary ammonium $\leq 2\%$, or oxidising ≤ 3 .

CLEANING METHODS ALLOWED

You can wipe the product with a soft cloth that is non-abrasive like a microfiber cloth, a disinfecting wipe, a soft brush similar to a paint brush in bristle stiffness or a sponge, but not a scourer of any sort.

You can spray the product.

You can rinse the product.

STERILISATION METHODS FOR DRAPES

You can expose the product to Hydrogen Peroxide Vapour (HPV).

You can sterilise the product in an autoclave or washer-disinfector (up to 134 °C, tested 200 cycles).

You can expose the drape to UV disinfection.
